

For Immediate Release

METROJET ADDS GULFSTREAM G650 TO HONG KONG FLEET

Metrojet opens one of the largest storage facilities in Asia

HONG KONG – 13 January 2014 – Metrojet Ltd, (www.metrojet.com) a leading provider of business aircraft services in Asia, is pleased to be selected as the operator of the first Gulfstream G650 to be registered in Hong Kong, and to announce that it has received the United States Federal Aviation Administration (FAA)'s approval in Q4 2013 for maintaining the new Gulfstream G650.

Mr. Björn Näf, Chief Executive Officer of Metrojet said, "The addition of the G650 to our fleet is a major milestone for Metrojet. It will be a 'first of type' in Hong Kong, and it also means that across our fleet of diversified aircraft, we are able to offer our clients the most complete business aviation range in Asia."

Gulfstream G650 is described as "the flagship of the Gulfstream fleet." It is an ultra-high-speed, ultra-long-range business jet. Carrying eight passengers, it can travel 7,000 nm (12,964 km) at Mach 0.85 and has a maximum operating speed of Mach 0.925. Metrojet foresees that there will be greater needs of long range aircraft in the Asia region; hence it is honoured to be recognised as a capable operator to manage and maintain the G650.

New storage facility opened in Hong Kong

Dedicated to championing service and operational excellence within the business aviation industry, Metrojet has recently opened a 25,000 square foot storage facility at the Airport Freight Forwarding Centre (AFFC), which is one of the largest storage facilities in Asia.

"The launch of the new facility is to support the expansion of Metrojet's business in the Asia region, and to offer greater storage space for our various suppliers such that our outstations in the region can also be fully supported. This shows just how committed the company is to its journey to excellence. 2014 is off to a great start," said Mr. Näf.

Established in 1995, Metrojet is a leading business jet operator and maintenance provider in Asia. The company offers comprehensive aircraft management, consultancy, maintenance and charter services and pioneered business aviation services in Hong Kong.
